Commercial Fish Scalers

**All you need to
scale tons of
fish per day
and...
it's easy to use!**

Commercial Fish Scaler

DIAMOND TOOTH TOOL

Supplied as standard equipment on all scalers. Will handle the majority of fish. Some examples include Flounder, Snapper, Perch, Whitefish, Salmon, Haddock and Sea Bass.

SIX FLUTE TOOL

Can be supplied in place of the diamond tooth on a new machine for an additional charge or as an extra accessory. Used mainly on large scale fish with thick skin. Some examples include Carp, Buffalo and Grouper.

EIGHT FLUTE TOOL

Can be supplied in place of the diamond tooth tool on a new machine or as an accessory. Used on small to medium scale fish with thin skin that can be prone to damage when scaled by coarser tools.

HANDPIECE

The handle grip is manufactured from high quality corrosion resistant aluminum and the drive shaft of rugged stainless steel. Two sealed ball bearings provide smooth operation and long handpiece life. All scaler tools will interchange.

GUARD

Guards are available in both small and large sizes. All cutters will work with both guards but the large guard is usually preferred when scaling large fish with the six flute tool as extra clearance is needed for the scales to flush out.

POWER UNIT

1/3 H.P. totally enclosed motor with bracket for overhead installation. Available in 1PH, 50-60 Hz, 115v or 220V. Handpiece holder doubles as on/off switch turning scaler off when handpiece is hung. Standard duty powers a 5/16" flexible shaft and the heavy-duty powers a 3/8" flexible shaft.
